MISCELLANY.

THE FAIR QUAKERESS.

AN EPISODE IN THE LIFE OF GEORGE III.

The only authentic portrait known of this admired fair one, the early favourite of George the Third when Prince of Wales, is at Knowle Park, the seat of Lady Plymouth. It is described as the portrait of Hannah Lightfoot, that being her married name. How it came into the possession of that noble family, none of the present race are able to explain.—It is however, suspected to have been sent there by Edward Duke of York, the brother of George the Third, before his marriage with Princess Charlotte of Mecklenburg Strelitz, as a deposit for safe preservation, until it could be disposed of elsewhere. The picture has been attributed to Gainsborough; but if so, it must have been an early production of that clever artist.—The late Duke Frederick of York had a beautiful enamel from this portrait, mounted in the lid of a snuff box, which after his death was in the possession of George the Fourth; and might now, perhaps, be found at Bifons, the seat of the Dowager Marchioness of Conyngham.

The father of Hannah Lightfoot was a linen draper, residing in St. James market, London, then a place of great traffic, and the leading thoroughfare from Leicester fields to St. James's Palace.—He afterward failed in business, then went upon the stock exchange, and being supported by members of the Society of Friends eventually amassed a fortune as a broker. Miss Wheeler was a very beautiful girl; and with the natural vanity of a fine woman universally admired, was very fond of displaying herself at the window, where she first attracted the notice of George the Third, when Prince of Wales, as he took his daily rides in his way from Saville House, Leicester Square to St. James's Palace. The celebrated Miss Chudleigh, afterward Duchess of Kingston, was the Prince's confidante upon this occasion; she was then one of the ladies in waiting on the Princess of Wales, the mother of George the Third and in her spirit of intrigue was predominant, from an early age; added to which she is known to have entertained a great dislike to the Earl of Bute, who then ex-

Prince and his mother.—To frustrate that Minister's views or perhaps, to create a breach between him and his royal pupil, and thus to revenge herself upon the Earl, is supposed to be the chief incentive for her interference in this mysterious affair. However certain it is, that she undertook the difficult task of introducing the enamoured Prince to the object of his affection: and when it is considered that the young lady was one of that shrewd, retiring and moral sect denominated Quakers, it may be readily conceived, that her office was one of great difficulty. The lovers are said to have had their first interview at a house in the Hay-market, where lodgings had been engaged by Miss Chudleigh expressly for the purpose. Here Col. George—the soubriquet of the Prince—and Hannah Wheeler continued to enjoy each other's society in stolen interviews, for some time previous to the death of George the Second. That a private marriage was solemnized between the Prince and Miss Wheeler, 1759, in name of George Guelph, it has been asserted is still capable of proof, Miss Chudleigh and Edward Duke of York being the witnesses thereto.

There is reason to suppose that Lord Bute was the first to discover this affair which created great uneasiness in the Cabinet at Saville-House, where the mother of George the Third then resided. On the matter being communicated to her she interferred; and not then suspecting it was any thing more than an amour, she pressed for and obtained a promise from her son, that he would discontinue the connexion. Lord Bute was not however satisfied with this promise, and discovering by some means that the intimacy was still persisted in, he sought an interview with the friends of the lady, when important disclosures took place. The result was a determination of the Prince's mother and the ministers, to obviate as far as possible the consequences of this imprudent amour, by accelerating the marriage of both parties, and for this purpose a negotiation was formed with Mr. Wheeler, the father of the lady, who foreseeing nothing but disgrace to his daughter and his family, from the threatened exposure of such a connexion, readily lent himself to the minister's views, the more so perhaps, as it was proposed to contribute a marriage portion for the lady on the day of her being affianced to Mr. Lightfoot, a person of her own persuasion and a suitor whom her parents had been anxious she should marry.

The Prince, then young and unsuspecting, although devotedly attached to the fair Quakeress, was naturally timid and irresolute; and, being completely under the dominion of his mother and the Earl

of Bute, was easily beguiled into acquiescence, under the belief that, if the lady had any legal claim, her subsequent marriage and the power of the Crown might annul it. Of this, however, the Prince quickly repented, and determined that, happen what might, he would not resign the society of the lady. Accordingly, while the ministers thought themselves quite secure in the success of their schemes and the parents of Hannah Wheeler were contemplating an equally satisfactory result in the approaching nuptials of their daughter, the lovers proved themselves by far the cleverest diplomatists.

It was agreed between them, the better to disguise their intentions, that the lady should consent to this marriage with Mr. Lightfoot, and, on the same evening, elope with her royal lover, who provided a safe retreat for her. Of this fact there is no doubt. The lady was so married to Mr. Lightfoot, at the Quaker meeting house, then in St. Martin's lane, and, on the same evening, before consummation, she stole away privately from her father's house, and, surrendering herself to a trusty friend of her royal lover, was conveyed off with such secrecy and security that no traces of her could afterward be discovered. Among the papers of the Earl of Bute, there was found a very severe letter from George III. remonstrating with that nobleman for his interference in this matter, and particularly censuring his conduct in making it known to his mother, the Princess of Wales.—The lovers continued to meet occasionally, until very shortly before the King's marriage with Queen Charlotte, when the lady was, with her children, for a time, removed to Devonshire; but, eventually, she returned to Kew, where she assumed the name of Oxford, and afterward, it is said, died in childbirth.

So cautiously was this intimacy managed, that the lady's father, her husband and family, could never discover her retreat. Mr. Lightfoot, it is said, only once caught a glimpse of his wife in a carriage, driving along Pall Mall; but as it was some years afterward, he might have been mistaken; however, before he could approach the vehicle, it had started off with increased speed, and was soon out of sight. It is due to the memory of George the Third to state, that he provided handsomely for his two sons by this connexion. One afterward obtained high office, and the other, a singularly clever but perverse person, obtained a lucrative situation in a Government office, which he resigned; he was afterward employed by Mr. Pitt, as an attaché in foreign affairs, and in that capacity was very useful at the commencement of the French revolution. He died a few years since, at Foley place, leaving an only son, wholly unprovided for, to whom his late Majesty William the Fourth behaved kindly.

The circumstances here narrated are said to have been the primary cause of the mental affliction of George III. who could never forget his first love, or forgive himself for abandoning his contract with her. This I do not believe—and for this reason—if there was any marriage ceremony between him and the fair Quakeress, which is doubtful, there was at that time nothing but political motives to prevent the Prince avowing it.—(From the MS. of the Duchess of Kingston.)

THE LOST BIBLE FOUND.—Most of our readers have seen historical notices of the misfortunes of the family of the Rev. Mr. Caldwell, of New-Jersey, in the Revolutionary war. Mr. C. was a pastor of the Presbyterian church at Elizabethtown, and like most of the clergy of that church, at that time, was a zealous Whig. His activity against the British made him a mark for their vengeance, and in one of their frequent excursions into that neighborhood, when he was from home, a company of soldiers surrounded his dwelling, and one of them deliberately levelled his musket at Mrs. Caldwell, while on her knees at prayer, and fired, killing her instantly. The party retreated, carrying off several articles of plunder, and among them Mr. Caldwell's family Bible. Not long ago, and more than sixty years after the event we have been recording, an old woman living on Long Island, called on one of the grand children of Mr. Caldwell, at Morristown N. J. and presented this identical Bible, containing the family record as made by Mr. C. in his own hand writing—then the record as made by the soldier who stole it.

POLISH YOUNG LADIES.—In Poland I have seen young ladies who had the strange habit of sucking very black pearls upon their faces: these looked somewhat like the mouches with which our ladies formerly tattooed themselves, and served to set off the whiteness of their complexion. "I cannot conceive," I once said to one of them, "how you contrive to place your lips on the very same spot to-day as you did yesterday?"—"I never take them off."—"Not to wash your face?"—"Why should I wash my face? it is always clean."—Napier's Mil. Life.

MISCELLANY.

ATLANTIC STEAM NAVIGATION.

The greatest achievement, perhaps, of the present day is the successful application of steam to ocean navigation. The influence of this grand and triumphant experiment is already felt in some measure in our commercial interests. Half the space between us and Europe is now destroyed permanently. This is very pleasant in a time of peace and shaking of hands. It were less so perhaps in times of commotion and wild wars. Politically considered, some will think it were better to have two Atlantics between the continents of America and Europe than annihilate the old one. The nearer we approach each other the greater our danger of getting entangled and involved in each other's troubles. However, there is no stopping this space-annihilating progress; we must fall in and make what good we can out of it. One thing it were well to consider that this steam navigation is not always to be a mere freight carrying or pleasure seeking intercourse.—These same 500 horse power contrivances can do other work than carry lace and silk and the like from land to land. They may suddenly become the *Mercuries* of war, floating battle-fields, flying artillery with a vengeance; and, whenever this may happen, the whole field and circumstances of war must be changed. The fate of nations will be cast, not on Waterloo fields, but on the ocean; not by glittering masses of infantry, but by dingy steam engine men, driving about their war machine, light as a gossamer, with 500 horse power, and Perkins' steam guns to match. —*Phila. Sentinel.*

COTTON CROP.—During the early part of the autumn new crop, bade fair for a full and satisfactory yield, and though the summer rains had fallen in too great abundance, no worse result than a redundant growth was expected, which we had hoped would, under late influences, have confirmed all our anticipations, and given us a harvest bordering in magnitude upon the last. In this we are disappointed—the subsequent destruction by caterpillar and worm having been very great in this and the neighboring states; while contemplating this reverse, however it is expedient to bear in mind that we have been favored since early in September with the most propitious weather possible for maturing the plant and harvesting its yield, and that we are, thus far, exempt from the boisterous weather usually attendant upon our autumnal equinox, and so generally mischievous in its effects. —These are prominent advantages, and if we had added to them an open fall, we think, yet secure enough of our staple to satisfy all wants, abandoning of course the expectation of what may be termed a large crop.

Our receipts of new plants up to date, 200,000, 443 bales; these have generally been of the late English advices, the offering lots hang heavily at that price, the market closing heavily.

The quality of the new cotton continues to present the superiority in staple noticed upon the first receipts in September, without, as yet, much amendment in color.

The Sea Island crop, though subject to severe visitations by rains and caterpillar has been much benefitted in Georgia and Florida by the fine weather of the last month, and promises now a fair yield. —From Carolina the reports are less encouraging. —*Savannah Georgian.*

Bunker Hill Monument.—We learn from the Daily Advertiser, that at a meeting of the Directors of the B. H. M. Association held yesterday, that it is probable a contract will soon be entered into for the completion of the monument. A contractor is ready to enter into an engagement to complete it for \$43,800. —This is exclusive of the grading of the grounds and the erection of a suitable fence, besides which there is a debt from the Association for money borrowed some years ago, amounting to over \$5000 with interest, which swells the amount to about \$7000, making the sum requisite for the completion nearly \$50,000.

For effecting this object, the present and anticipated resources are the following: The funds in the hands of the Treasurer, the President, and Treasurer of the Mechanic Association, together with the subscriptions of sundry individuals, are more than equal to the amount of the debt. The net proceeds of the fair including several contributions, exceed \$30,000. In addition, two gentlemen are ready to pay over \$10,000, as soon as it shall appear that the conditions of these munificent donations are complied with. This will no doubt be accomplished in a few days, making the sum available for the completion of the work \$50,000. —*Transcript.*

REVOLT AMONG THE SLAVES.—The Howard (Maryland) Free Press of Saturday says:

A most desperate affray took place on Mr. Green's plantation, in Anne Arundel county, on Friday, but which fortunately terminated without any serious injury to the parties concerned. Three or four of the negroes employed by Mr. G. refused to obey the orders of the overseer, and threatened to murder his family, and he attempted to chastise them, but they resisted his attempts. He found it necessary to summon a posse comitatus, and an officer was immediately sent for, who arrived in good season, but not before the negroes had armed themselves with

scythes and clubs ready to resist all attempts to arrest them. The officer, together with the overseer, attacked them, but after a desperate effort they were compelled to give up the conflict.

The negro who was armed, made a pass at the head of the officer, who barely escaped having his head severed from his body, the weapon passing immediately over it; the officer at this issue discharged a pistol at the man and lodged the contents immediately under the left shoulder, but with no serious effect. The negro, who was a strong and muscular man, made another pass at the overseer and struck him on the arm, the weapon, however, glanced downward, and only severed the flesh from the bone. The officer and overseer then found it necessary to retreat and recruit their force; they were however, pursued by the negroes, and only made their escape by the fleetness of their horses. The negroes, with one exception, have since been arrested and committed to jail.

ANOTHER BOAT LOST.—Seven lives destroyed.—Through the politeness of Capt. Hemmings, says the New Orleans Picayune of October 1st, of the Rienzi, we received the particulars of the loss of the Pike a light draught boat laden with lead from Galena. The Pike was about two miles below Alton, descending, in the night, when she met the Glaucaus and Fayette coming up. The Fayette was behind the Glaucaus, and was not perceived by the Pike until, in escaping the first, she found herself doomed inevitably by the Fayette. The pilot made the last attempt in his power to save the boat, but his effort was in vain, for the bows of the Fayette struck the Pike amidship, tearing her almost in two parts, and sinking her immediately. Seven persons are known to be lost, and it was suspected that many more are yet to be accounted for. Great consternation prevailed in St. Louis at the time the Rienzi left. Verbal intelligence described the scenes most appalling. Drowning wretches screaming in the hurrying flood, in night and darkness—victims waking from sleep and speeding into eternity ere their minds opened to a consciousness of their hapless destiny—terrible! We can know no further particulars until the next boat arrives.

THE GOODWIN SANDS.—A safety beacon has been erected on the Goodwin Sands by which it is hoped to avert the dreadful loss of life by shipwreck so often occurring at that dangerous part of the British Channel. It is thus described: It consists of a column about 40 feet above the level of the sea, having clefts and ropes attached to four of its sides with holds for hands and feet. At the summit of the column is attached a gallery of hexagon form, made of trellis work, and capable of holding twenty persons at one time. Above the gallery, and in continuation of the column, is a flag staff 10 feet long, thus making the entire height 50 feet in height. The sides of the gallery are so constructed as to enable the persons in it to be covered in with sail cloth, which is reefed in and around it and can be used at pleasure—as also an awning to pass over it, which is fixed to the flag staff—thus entirely protecting any unfortunate mariner who may seek shelter on the column from foul and tempestuous weather. A barrel of fresh water, together with a painted bag enclosing a flag of distress, is stationed on the words "hoist the flag" painted in the languages of all nations on boards stationed round the inner part of the gallery, so that the foreigner, as well as native seaman, may be enabled to show a signal of distress, and obtain help from shore, which is about seven miles from the beacon.

Schools in Ireland.—There are now in Ireland 1581 national schools attended by 205,000 children. Increase during the year, 187 schools, 23,786 children.—In the education of the child is the destiny of the nation concerned. To the oft recurring inquiry—what can be done to remove this or that evil which infests society, the almost invariable reply is, and must be—educate properly the rising generation. Is not this obvious and well known maxim too little remembered and acted on even in the attempts to reform what is wrong in our country?

Temperance Pledge.—We understand that on Sunday last the Rev. Mr. Curry, pastor of the Roman Catholic church in this city, administered the temperance pledge to three hundred and sixty of the Irish who attend that church. Mr. Curry has been unwearied in his exertions in the cause of temperance, among that class, and we are happy to learn that his labors are likely to be rewarded with abundant success. We understand that they pledge themselves against drinking any kind of ardent spirits, wine or ale, and not to visit any place where such articles are sold. —*Providence Journal.*

MURDERER ARRESTED.—Ferguson, who lately shot his wife in Exeter, has been captured in the woods near Sanborn, and conveyed to Portsmouth jail. The Portsmouth Journal says in relation to the murdered woman, that she was the daughter of the late Mr. John Frothingham, of Portsmouth, and grand daughter of the wife of Lord Timothy Dexter, of Newburyport. She was well educated, and moved in a good circle in society. Her husband was formerly a journeyman hatter in Portsmouth, and afterwards in Newburyport. She has been married twelve or fourteen years.

THE NEWPORT HERALD.

NEWPORT,
SATURDAY, October 17, 1840.

The General Assembly.

Of this State, will convene at Bristol, on Monday week, the 26th inst, agreeably to adjournment.

A U. S. Senator is to be chosen at this Session of the Assembly.

Georgia Election.

We have returns from 67 counties of the votes for Members of Congress, which give for the Whig ticket a majority of 5496. The remaining counties gave a V. B. maj. last year of 3614. If they come in the same this year, the Whig majority in the whole State, will be 1872.

LEGISLATURE.—The Legislature consists of 300 members, viz. Senate 93, (one from each County); House 207—the Whigs claim a net gain of 32 members, and a certain majority on joint ballot, which will secure a U. S. Senator.

New-Jersey Election.

The election in this State, on the 13th and 14th inst. was for Members of the Legislature, and has resulted in a large Whig majority in both Branches:—The following is the probable result:—Council, Whig 12, Van Buren 6—Assembly, Whig 37, V. B. 16—Whig maj. in joint ballot, 27.

Pennsylvania Election.

The election in this State on Tuesday last, was for members of Congress and members of the Legislature.—We have received returns from Philadelphia, and a few other counties.—It will be seen that the Van Buren party have made a large gain in the city and county of Philadelphia and elected C. J. Ingersoll to Congress in place of Naylor, (Whig).—In the other districts, there appears to be a Whig gain.

In the First Congressional District, C. Brown, V. B. is elected by a majority of 1384 over Tyson, Whig.—In the 2d district, Messrs. Sargeant and Tolland, Whigs, are re-elected, by a majority of 2519.—In the 3d district, C. J. Ingersoll, V. B. is elected by a maj. of 1198, over Mc Michael, Whig.

In Bucks County, Mr. Ramsey W. is elected by a majority of 236 over Mr. Davis V. B. the present member.—In Schuylkill County, Messrs. C. J. Ingersoll and V. B. are elected by a majority of 1198, over Mc Michael, Whig.

Delaware Election.

The Whig majorities for Inspectors of the General Election, were as follows: New Castle Co. 133; Kent Co. 354; Sussex Co. 229.—Total 716.

STATE ELECTIONS.

VERMONT.—The Legislature of Vermont assembled at Montpelier on the 8th inst. Carlos Coolidge, Esq. of Windsor, was chosen Speaker of the House, by 164 votes. Mr. Vilas, the Van Buren candidate, had 58, and there were 4 scattering. F. F. Merrill, of Montpelier, was chosen Clerk, by 173 votes; O. H. Smith had 54. P. T. Washburn was chosen Assis. tant Clerk by 172 votes, and O. Billings Engrossing Clerk by 172.

In the afternoon, in joint assembly of the two Houses, the canvassing committee reported the votes given by the people for Governor, &c. as follows:—For Silas H. Jenning, 33,435; P. Dellingham Jr. 22,637; scattering 45; maj. for Jenning 10,798. For Lieut. Gov. D. M. Camp 33,366; E. D. Barber 22,470; scat. 31. For Treasurer, H. F. Jones 33,445. Daniel Baldwin 22,554, scattering 20.

MARYLAND.—The Maryland election, which was for the choice of seven Senators, out of 21, (one third only going out annually,) and 79 members of the House of Delegates took place on Wednesday, the 7th inst.

The result is a Whig gain of three in the Senate, and 21 in the House of Delegates. The Legislature will stand.—Senate, Whigs 15 V. B. 6.—House Whig 60 V. B. 19.

In the popular vote, it is estimated that the Whig majority will be 2557.

We understand that the swift steamer Balloon has discontinued her trips and returned to New-York.

FIRE.—The Store of Mr. Johnson, in Mobile, was destroyed by fire on the 30th ult. Loss about \$10,000, but was insured.

United States and Mexico.

The National Intelligencer of Wednesday last, says:—

We regret to learn that very little progress had been made by the Joint Commission under the treaty with Mexico for the adjustment of claims of citizens of the United States against Mexico, before their adjournment for several weeks, which took place some days ago. We are mortified by this information, because having been decided and earnest advocates for an amicable adjudication and final arbitration of those claims, in preference to a resort to arms for redress of the alleged grievances of our citizens, as proposed to Congress by the Executive, we looked with confidence to a prompt and just action upon the subject.

In accordance with the Convention between the United States and the Government of Mexico for the adjustment of the claims referred to, the Commissioners of the two countries were to have met on the 7th of July; and at that time the very respectable Commissioners appointed on the part of the United States were ready to commence their labors. Owing to some causes with which we are unacquainted, the Commissioners on the part of Mexico did not arrive in this city, the place designated in the Convention for their meeting, until the middle of August.

Since the 17th of August, the Commissioners have had regular meetings until within a few days past, when they adjourned for a short time without having established any rules for their future government in the adjudication of the multifarious claims that will be presented to their consideration. A painful anxiety is naturally felt on this subject by the claimants, to whose position the Public can not be supposed to be insensible.

We are at a loss to imagine what difficulties have arisen to frustrate an object so indispensable to a judicial tribunal (in which light this board of Commissioners must be considered) as fixed rules of action.

Where the responsibility rests for this procrastination, or rather from this omission to act at all, we are unable to determine. Judging of the future by the past we apprehend that the time designated in the Convention for the completion of the labors of the Board will be far too short.

FROM FLORIDA.—By the steamboat Forrester, Capt. Wray, we have received the Jacksonville Advocate of the 29th ult. and St. Augustine News of the 25th ult. we make the following extracts:

At the South, the Indians are tolerably quiet, though they are, without doubt, there in great force. Their trails are large, and frequent. Near Fort Dallas they amused themselves with carrying off mauls, wedges, &c. used in preparing steamboat wood, and when at a loss for other employment made a bonfire of the wood.

But we have not heard of a more inhuman butchery than that perpetrated on the person of young Geiger of Fort Clark. With the circumstances our readers are familiar: they are too awful to be again detailed. We only ask the reader to pause for a moment, and say, what sacrifice be too great to rid us of these monsters!

The schr. Wm. E. Jester, loaded with government stores, was last weeked on St. John's Bar. No lives were lost; and the cargo was taken from her by the steamer Santee and schooner Ambuscade.

The wreck was to be sold this day.

Savannah Georgian.

We copy the following article from the Boston Transcript of Monday last:—

"Awake, Thou that sleepest!"—Quite a sensation was created, yesterday afternoon, in one of the Churches of our city, by the young clergyman, who was attempting, rather unsuccessfully, to instruct and enlighten an "a' noddin, noddin, noddin" congregation. The Rev. gentleman, after resorting to the expedient of exalting his voice to a pretty high and firm pitch, without producing any very sensible effect, and probably thinking that it was useless to exert his dorsal and abdominal muscles for nothing, left his notes, and treated his "sleepers" to an extemporaneous blowing up for their drowsiness—short, but so warm and spirited as to operate on "all concerned" like an electric shock. The preacher then returned to his discourse, and delivered the remainder of it to as wakeful a body of worshippers as ever honored pastor with devout and sleepless attention."

Another Murder on Long Island.—A correspondent of the Brooklyn Daily News has furnished that paper with an account of another murder on Long Island, committed near Patchogue, Suffolk county, late on Friday night last, by a man named Samuel Johnson, upon his wife. The deed was committed about 11 o'clock at night, in the presence of the family, with a gun, and so fatal was the discharge that she died in 19 or 20 minutes. After he had committed the horrid act he stepped out of the door and left his gun, when after remaining a few minutes he returned, and enquired of his wife's mother if she was dead? She said she believed she was. On learning this he made himself scarce; the News learns that he was afterwards found secreted in his own cellar.

LOSS OF WHALE SHIP ERIE.

By the arrival here on Monday of Mr. Morry, late mate of the Whale ship Erie Den is of this port, we are informed of the total loss of that vessel.

He states that on the 17th of May last that she was beating out of—Bay, at night, having just started on her voyage home, where she was suddenly taken aback, and thrown on the beach, and soon bled. She had on board 2600 bbls oil (230 sp) which was sold by the Captain, on board as she lay, for \$1 per bbl. 2100 bbls were subsequently saved, and also her sails, rigging, spars, boats and try-pots, all of which were sold.

A gale which occurred a few days afterwards broke the wreck entirely to pieces.

Spoken, Aug. 2d, lat 54, lon 84, bark Royal William of St. Johns, N. B., with 2400 bbls oil; had taken 1200, bbls out of the wreck of the Erie, of Newport, lost at Chatham Islands: had on board the Captain, and 4 of the crew, the rest of of the crew remaining at the Islands.

LETTERS FOR ENGLAND.—A correspondent of the Journal of Commerce, dating from Boston, says that there is no charge on letters conveyed to England by the Cunard line of steamers from that port. All that is needful to be done, is to have them lodged at the post office in that city before 10 o'clock on the 1st and 15th of the month. The post office charges one cent on each letter, thick or thin.

The Savannah Georgian states that a short time since Lieut. Saunders, 2d Dragoons U. S. A. being on a scout, captured an Indian warrior on We Kiwa river. After hearing his story and placing no confidence in it, ordered him to be shot, which was done and hung him up as a terror and warning to his party. He had about him a portion of the dresses and trinkets of Forbe's theatricals, and cartridges which were taken from a portion of Col. Harney's command who were a short time since shot at the same place.

Gale.—The Buffalo Journal states that a heavy and destructive gale had just been experienced on the lake. A number of vessels of all kinds had suffered damage in attempting to make the dock some of them having been completely stripped of masts, spars and rigging; others had been dashed from their moorings, and many of the steamboats were very materially injured. There was a report of the loss of two lives, but it was not traced to any foundation.

The steam ship Great Western left New York on Saturday last, for Bristol, with 97 passengers. She carried out about \$100,000 in specie. The Havre packet had on board \$240,000, chiefly Mexican.

A man died recently in the prison of Ghent, who had been confined there 42 years, having been condemned in 1798, for highway robbery.

An Illegal Suit.—A fellow named Williams committed a robbery in a hotel in Norfolk last week, and was committed to jail, but contrived to make his escape. His clothes being rather the worse for the wear, he went into a merchant tailor's store, fitted himself to a nice suit, and while the tailor was making out his bill for the same, he slipped out at the door and made off, leaving his old suit in payment for the new one. Chase was made for him, and he was soon overhauled, and lodged in jail. The suit which he thought to obtain so easily, is likely to prove a dear one to him.

Hints to the Consumptive.—Dr. Lator, of Paris has published the following rules for preventing the advent of consumption in those who are predisposed to it: A consumptive patient should inhabit a dry, airy locality, well exposed to the solar rays. Residence in any large city predisposes to consumption. A temperate climate should be chosen, where the variations of the temperature are neither sudden nor frequent. Travelling, and particularly sea voyages, are attended with decided advantage in the early stages of consumption. The patient should be warmly clothed, and covered with flannel from head to foot. He should take habitually some moderate exercise, as walking, riding, &c.; exposure to open air and the sun's rays is absolutely necessary. He should exercise the mind in a moderate degree, but avoid all strong moral emotions. He must renounce any profession which requires strong muscular exertion, a bent position of the body, residence in a damp, moist, place, &c.; and, finally, the food should be rich and nourishing.

An old man, name unknown, was instantly killed on Monday afternoon, by the locomotive and train on the Philadelphia and Baltimore Railroad. He was standing at the end of a bridge leaning against an abutment, when he met his death. —*Philad. Nat. Gaz.*

FROM MEXICO.

By the schooner Cumanche, Capt. Hoffman, we have received advices from Matamoros to the 1st instant, and papers from the Capital to 15th ult. The Government appears to be mainly engaged in strengthening their position—drawing around them loyal troops, and searching out and arresting persons known or suspected to have been engaged in the late demonstration against the powers that be.

Tamaulipas seems at present to be the great seat of war. Arista has a well appointed force. He marched to route the Federalists, but marched back again on learning that the Texian vessels were off Matamoros. It is not improbable that Canales and Cardenas would fall back into Texas in case of the advance of Arista with a considerable force, and that the latter would pursue them into the State Republic.

The receipts of the custom houses of the ports of Tampico and Matamoros, have been pledged for the payment of the troops under Arista.

MATAMOROS, Aug. 29.

About 350 Labacer and Nachidoch Indians (some of which are of the Cherokee tribe,) crossed the river here on the 25th, fully armed and equipped. They will doubtless join Arista. The arms for equipping themselves were furnished them here.

The military force that remains here amounts to about eight hundred.

FROM TEXAS.

By an arrival on Saturday, dates of the 19th from Galveston, and the 9th from Austin, were received. We regret to notice the death of Col. Karnes, a meritorious officer in the Texian army. His fame stood very high as an Indian fighter and pioneer. General Felix Houston had recovered from sickness brought on by fatigue in pursuing the savages. A public dinner had been tendered him at Austin by way of acknowledgment for his gallantry in the late skirmish with the Comanches. Col. W. G. Cook has been appointed to the command of the 1st regiment of infantry, in place of Col. Busleson, resigned. A decided improvement is announced in the health of President Lamar, who had been ailing for some time. In Galveston they are about erecting an Episcopal Church. A fair was held there on the 17th inst. to raise funds for the purpose. The inhabitants had returned to L. Neville, and were busily engaged in repairing the injuries done by the savage enemy. The loss in buildings and other property is estimated at one hundred thousand dollars. Advices were received at Austin by express from San Antonio, stating that an army of Mexican Centralists, one thousand strong, had crossed the Rio Grande. They were in pursuit probably of the Federalists. The health of Texas appears to be good. The Indians have fled in to the mountains, and all apprehensions of danger from the quarter are for the present dismissed.

A CRUEL MURDER.—On Thursday last, says the Exeter News Letter, Brad Fergusson having attended the Regimental Muster at Epping, and done duty as a soldier, returned home in the evening and soon drove his wife from his house into the house of a neighbour, for protection. He had been drinking not to absolute drunkenness, but to the exciting of all his bad passions, and to the straining of his muscles to an unnatural strength. He soon followed his wife into the neighbour's house, and there he treated her being given up to him and treated his neighbor with violence upon his interfering in her behalf. The police officer was sent for, after 10 o'clock, and Mr. Fergusson returned home while they were in the house. She stated to them that she had been abused by her husband that evening and at other times. He denied it, and asked her to "show me marks." After a good deal of conversation, he promised the officers that he would not abuse his wife that night, but would be quiet, and in the morning he would give her a divorce and leave her for he would not live with her any more. The officers asked her if she would suit in the house with him, and she finally consented, saying she would "try to." She was then left alone with him and their six children, the oldest being about 12 years old. In the course of the night the children were awakened by the discharge of a gun. They run into their mother's room and found her lying on the floor, and their father standing by. They asked what he had done, and he answered that he had shot her. She requested him to lay her upon the bed and he did so. He then inquired of her where his clothes were and she told him. He got them together, and told her that he should not have shot her if she had not provoked him to it. She was too far gone to make any reply, and spoke no more. He gave his gun to his oldest son and left the house. The children then went to Mr. Fergusson lived some minutes after the came in but was speechless. She died before the physician reached her. An examination of the body it was found that a charge of powder and shot had entered her abdomen and occasioned her death.

Novel Inkstand.—An Englishman named Penny has invented an inkstand which prevents the ink becoming mouldy or evaporating. He has applied the principle of the air pump in such a way that by turning a screw the cup of inkstand is instantly supplied with pure filtered ink from a reservoir below, which reservoir the ink in the cup ascends again, when a reverse turn is given to a screw. On its upward journey

it passes through a small sieve of fine silver wire, by which all impurities are excluded. The contrivance is ingenious and works admirably; giving to the filter inkstands a manifest superiority over any other kind in existence.

MARRIED.—On the 22nd August, at the Parish Church of Hableton, by the Rev. John Vernon, James Hobbs, Esq. of Chaddlesley Corbett, after a lengthened courtship of four days to Harriet, youngest daughter of Mr. William Chambers, of the new House, Hableton. The youthful bridegroom was rather past his prime, being in his 77th year, consequently had no time to lose; his fair bride, (who has nearly seen sixteen summers) had pity on him, and took him off hand, "for better or worse," after he had settled upon her the whole of his property, amounting to upwards of £800 a year. It seems that the newly made Benedict offered his heart and hand the previous Monday to Miss Susanah Chambers, the bride's eldest sister and being refused, made overtures to the next sister, Miss Ann, from whom he also received a repulse; but, determined not to be balked in his intention to obtain a young wife, and remembering that "faint heart never won fair lady" he tried a third time, and, as before stated, was successful. Miss Harriet being unable to resist the present solicitations of the persevering wooer. The lovely couple are now in this town spending the honeymoon.

POSTSCRIPT.
No Mail was received by Steam boat this morning, from New York.
By the arrival of the Steam Boat Massachusetts this morning from New York, we have received the N. Y. American of last evening and a ship from the Standard Office, they contain further accounts of the Pennsylvania election, but differ widely as to its results. The American says it is certain that the Whigs have the State Senate by a considerable majority, and the probabilities are very strong that we shall also have a majority in the House of Representatives. With regard to Congress, we have gained one member in Bucks, and one in Lycoming, &c.
The Standard makes the Van Buren gain 6300, and states that the 29 counties to be heard from, gave a large Van Buren majority in 1838.
The N. Y. Com. Advertiser of last evening says, that the Whig maj. in joint ballot in New-Jersey, is 37.
It also gives returns from Pennsylvania more favorable to the Whigs.

The U. S. Rope Walk at the Navy Yard at Charleston, (Mass.) is said to be the most perfect in the world. It is 1000 feet long, with granite walls, slate roof and iron window shutters. The spinning, &c. is done by a steam engine.

BOOKS,
Lent—and not returned.
3D Volume London Monthly Review, being one of a set of 106 vols.—1st vol. Knowles' history of the Turkish Spy —4th vol. Dr. Reid's works—2d volume Kaim's elem. Criticism—Lucian's works all 4 vols.—Savary's letters on Egypt, both vols.—Tasso's Jerusalem delivered, 6 vols.—Hume's Essays, 2 vols.—Memoirs of Comte de Grammont, 2 vols.—Memoirs of Marmontel, 2 vols.
I find that there are over 50 vols. more of my Books loaned out, but I shall be glad to get back those above named.—Do let me have them again, good friends, at least those which belong to valuable sets; the detention of which will be a serious injury, while the odd volume kept, will be of no use to any body.
But you do not remember that you ever borrowed any books of me, and do not think that you have got any of my books. To be sure you don't, for whoever took the trouble to remember any thing about borrowed books, or the owner? But it is not a bit the less certain that my lent books are all of them, somewhere about the houses of some or others of you, and, if you will take the least trouble to make a very slight search, you will be sure to find them.
If any of you will be so uncommonly obliging as to take this little trouble, and will send the books you may find to the Book & Stationary Store of Wm. & J. H. BARBER, I shall consider my self as having received so many handsome pre- sents from you.

The following are a few of the Edito- rial Notices in favour of DR. RICHARD SON'S Celebrated Sherry Wine BITTERS.
From the Old Colony Memorial Plover. RICHARDSON'S SHERRY WINE BITTERS.— This is an excellent medicine for the warm season; being prepared from medi- cal plants it is a pretty sure preventative of all those diseases which human flesh is heir to. It is particularly recommended for Dyspepsia, Jaundice, Liver Complaints, &c. A fresh supply has been received by the agents in this town. Full directions accompany each bottle.
From the Amherst Representative, Mas- sachusetts N. H. RICHARDSON'S BITTERS. To those who are unwell and wish for a good medicine we Recommend them to try these bitters, which may be found for sale at No. 26 Elm-st.

From the Lincoln Telegraph Bath, Me. We have no hesitation in affirming that Dr. S. O. Richardson's Sherry Wine Bitters which may be found at Dr. Wilkinson's Dr. Whitch's Dr. Waldron's, on D. F. Kendall's is the very best medicine that can be taken for a majority of Spring complaints.
From the Barnstable Patriot, "Health and Strength."—To regain or preserve these, is the great desideratum.— No thing that we know of, will do more effectively, this warm weather, than Dr. Richardson's Sherry Wine Bitters. Try 'em—the strictest temperance man need not be afraid of the alcohol in them. There is no more of it than is absolutely necessary to preserve the spirit of the "Roots and Herbs," of which they are compounded.

From the Northern Star, Warren RICHARDSON'S BITTERS. Dr. Richardson's Sherry Wine Bitters, advertised in our columns are recommended very highly by the press and by physicians generally. It has one virtue which to many is considered very important—it is prepared by an able and experienced phy- sician, a regular M. D. We have tested its qual- ities, and so far as we are able to judge, it is every thing it is cracked up to be.
From the Boston Morning Post. Dr. Richardson's Sherry Wine Bitters are an excellent medicine. We have taken a bottle of them, and are about ten years younger (in our feelings) than we were a month ago.
From the Essex Banner & Haverhill Advertiser This is the season for the use of this highly valuable medicine. It is the most safe and effectual family medicine for diseases which it professes to cure, that has ever been discover- ed. It is composed of different roots & plant We like the Bitters, because they are no quack but prepared by a regular practical physician who says but very little about them himself but leaves for those who use them, to make their own statements of their beneficial effect upon the

For sale in Newport, by R. Taylor S. Sterne, John Easton, Geo. Knowles and John J. Allan. Price 75 cents per bottle.

POETRY.

WOMAN

By THE HON. MRS. NORTON.

Warriors and statesmen have their meed of praise,
And what they do or suffer men record;
But the long sacrifice of woman's days,
Passes without a thought—without a word.
Of duty, nobly, faithfully fulfilled—
For which the anxious mind must watch and wake,
And the strong feelings of the heart be stilled,
Gone, unheeded as the summer wind,
And leaves no memory and no trace behind;
Yet, it may be, more lofty courage dwells
In one meek heart which braves an adverse fate,
Than his, whose ardent soul indignant swells,
Warm'd by the light, or cheer'd through high debate;
The soldier dies unrounded; could he live
Alone to suffer and alone to strive?
Answer, ye graves, whose suicidal gloom
Sheds deeper horror than a common tomb!
Who sleeps within? The men who would
Evade
An unseen lot, of which they felt afraid,
Embarrassment of means, which worked annoy,
A post-remorse—a future blank of joy—
The sinful rashness of a blind despair—
These were the strokes which sent your victims there,
In many a village Church-yard, simple grave,
Where all unmarked the cypress branches wave;
In many a vault where Death could on y claim
The brief inscription of a woman's name;
Of different ranks, and different degrees,
From daily labor, to a life of ease,
(From the rich wife who, through the weary day,
Wept in her jewels, grief's unceasing prey,
To the poor soul who trudg'd o'er marsh and moor,
And, with her baby, begg'd from door to door,)
Lie here, which ere they found that last release,
Had lost all memory of the blessing "peace,"
Hearts, whose long struggle through unquiet years,
None saw but Him, who marks the mourner's tears;
The woe which He had willed should be their lot,
But served themselves to bear.

NOTICE ALL.

THE Subscriber deems it necessary to close up all Notes and Accounts appertaining to the late firm of **WEDDER & BULL**, and to this end requests all who are indebted to said firm, (except in the few cases where credit has been particularly stipulated for,) to make immediate payment, or offer satisfactory terms for the future liquidation of the same; as all such Notes and accounts as remain unpaid, on the 1st day of Feb. next; where the non payment of the same is an act of neglect, rather than of ability, must be sued for collection.

I cannot recognise the correctness of the principle of charging *Good customers* more than a fair profit, to make up for losses occasioned by selling to those who are reputed for bad pay;—and as I solicit the patronage of those only who are able, and willing to pay, I do it with a view to sell to all my Customers alike, at as small a profit as I can possibly afford.

THE HAIR! THE HAIR!

NO better evidence is wanting to show the superiority of the Genuine Buffalo Oil, over the preparations, than a number of Druggists are endeavoring to imitate and foment false imitations, on the public, for genuine. Read advertisement. Beware of place.

Genuine Buffalo Oil is fast taking the place of all other articles to promote the growth, soften and beautify the Hair; its use gives it a softness that no other article does, and causes it to curl beautifully—by free use it will darken and give the hair a satin gloss. It is highly perfumed and gives perfect satisfaction to all that have given it a trial. You will observe the signature of the proprietor, "William Brown," also "Buffalo Oil," imprinted on the bottle. In consequence of a counterfeit which has recently appeared and is now for sale, I have been persuaded to obtain a new label engraved on copper, for which I have secured a copy right, entered according to act of Congress in 1839, in the clerk's office in the District Court of Massachusetts. Any infringement will be dealt with according to law.

None genuine, unless signed in my own hand writing. For sale in Newport by R. J. TAYLOR and Dr. R. R. HAZARD, August, 22.

ICE CREAMS! ICE CREAMS!

COUGHS, COLDS.

AND ALL DISEASES OF THE LUNGS.

THE VEGETABLE PULMONARY BALSAM is believed to be deservedly the most popular Medicine ever known in America, for coughs, colds, asthma or phthisis, consumption, whooping cough, and Pulmonary affections of every kind.

The Vegetable Pulmonary Balsam has been very extensively used for about 12 years; and its reputation has been constantly increasing. So universally popular has this article become that it may now be considered as a standard article in a large part of the United States, and British Provinces. Many families keep it constantly by them, considering it the most safe as well as certain remedy for the above complaints. The Proprietors have received, and are receiving numerous recommendations from many of our best Physicians, who make use of it in their practice. The names of a few individuals who have given their testimony in favor of this article, are here subjoined, and for a more full account see the envelope to the bottle.

Dr. Amory Hunting, Dr. Samuel Morrill, Dr. Thomas Abell, Dr. Timothy Bayle, Dr. Thomas Brown, Dr. Jerry Ellsworth, Dr. William Perry, Dr. Albert Guild.

CASE.—Extract of a letter from Mr. C. Clay, Kingston, Ulster county, N. Y. to the Proprietors.

Yours of the 9th inst. was duly received. A remarkable cure was effected by the Vegetable Pulmonary Balsam, in the Winter and Spring of 1837. The person, Mr. Moody, had been sick a long time with the consumption. The physician had given him up. He was reduced so low as to be unable to help himself, and was raising a large quantity of blood, when he commenced using the Balsam, which effected a complete cure, and he is now as hale and hearty as ever he was. Mr. Moody has removed from this town but he has promised me a more detailed account of his case, which I will forward you.

C. S. CLAY.
Kingston, N. Y. June 25, 1838.

Argyle, Nova Scotia.

In the winter of 1837 and '38, I was seized with a violent cough, which continued two or three months. My cough was so severe that I was obliged to sit up in bed two or three hours during the night, and I was much reduced in flesh and strength, and my appetite gone. One of my neighbors had a bottle of the Vegetable Pulmonary Balsam, which he could not sell. He however loaned it to me till I could procure him another. I experienced immediate relief from it. The first opportunity I had, I procured more of it, and to the use of it I ascribe the preservation of my life.

Dec. 17, 1839. JAMES W. LENOX.

Counterfeits, Beware of Imposition!

Each genuine bottle is enclosed in a blue wrapper, on which is a label, signed by Sampson Reed. None other can be genuine.

The outside Yellow Label will have on and after December 1839, in addition to that of Sampson Reed, the signature of W. R. JONES, CUTLER, or his partners.

The great celebrity of the Vegetable Pulmonary Balsam has been the cause of attempts to introduce spurious articles which by partially assuming the name of the genuine, are calculated to mislead and deceive the public. Among these mixtures are the "American Pulmonary Balsam," "Vegetable Pulmonary Balsam," "Pulmonary Balsam," "Carte's Compound Pulmonary Balsam," and others. Purchasers should enquire for the true article by its whole name—"The Vegetable Pulmonary Balsam," and see that it has the marks and signatures of the genuine.

Each bottle and seal is stamped "Vegetable Pulmonary Balsam."

One more Counterfeit, besides the "American Pulmonary Balsam," and others above alluded to!—An attempt has been made to deceive the public by a spurious mixture called "Vegetable Pulmonary Balsam," sometimes signed Samuel Lee—said to be prepared by an unprincipled man in Bangor, Me. The name is written in a way to resemble the genuine signature, and is a most foul attempt to deceive the public, and avoid the punishment that awaits actual forgery.

For sale by REED, WING & CUTLER, (late Lowe & Reed) wholesale dealers in Drugs, Medicines, Paints and Dye Stuffs, No. 34, Chatham Street, Boston, and by Druggists and country merchants generally in New-England, and in the principal places throughout the United States and British Provinces.—Price 20 cents. Aug. 22—1y.

The above Balsam, is for sale in Newport, by R. J. TAYLOR, Agent.

INDIAN BALSM OF LIVERWORT.

A COUGH is always dangerous. In old changeable and severe climate, it is all important to attend to COLDS, with which we are all more or less afflicted. If neglected too long, it is difficult to remove them, sometimes impossible, and confirmed consumption is the result. In all Lung complaints, Mrs. N. M. Gardner's Indian Balsam of Liverwort is justly esteemed of infinite value. It has been used for eight or ten years with unequalled success, and many individuals might be named, who, but for its healing virtues and renovating powers, would not be present now to testify to its efficacy.

THE above is for sale in Newport, by R. J. TAYLOR, Thames-st.

GUARDIAN'S NOTICE.

THE Subscriber has been appointed by the Court of Probate for the town of Portsmouth, Guardian of the persons and Estates of *Emily, Margaret B. and Anna Chace*, minor children of Peter Chace, late of New York City, dec. and has qualified himself, by giving bonds according to law. He therefore requests all persons interested, to take notice and govern themselves accordingly.

THE MOST POPULAR SUMMER BEVERAGE, IS WM. BROWN'S SARSAPARILLA COMPOUND, OR MEAD SYRUP.

It is the true and genuine article. Price 50 cents a bottle, with the Seal.

Its extensive use the last summer, is attested in part the uncommon prevalence of health during the summer season. The strength of the Sarsaparilla is extracted on an entire new plan, by a steam apparatus, that prevents all evaporation, which is very much approved. When made a common beverage, it will purify the blood, and remove all humors from the system. At the rate that it has commenced selling this season, I shall extract the strength from ten thousand pounds of Spanish Sarsaparilla. It differs entirely from the common Mead Syrup, and has already gained a reputation as high as its merits are unquestionable. Every body is sending for the article, and every body is complimenting it in the most flattering terms. Indeed it is literally in the mouth of the whole community.

NOTICE.—As an evidence of the superiority of William Brown's No. 1 Silver Top Sarsaparilla Compound or Mead Syrup over all other kinds, and to convince the public that it does contain the virtues of Sarsaparilla, the article that is celebrated for purifying the blood, and removing all humors from the system, and rendering the body healthy and strong.

Certificate of P. B. Fessenden.

I hereby certify, That within the last two months, I have prepared in my mill, for Wm. Brown, Chemist, 481 Washington-st. Boston, two thousand five hundred pounds of the best Spanish Sarsaparilla, the greater part is already used up in manufacturing his celebrated Mead Syrup. I have further ordered to prepare more.

P. B. Fessenden, Cambridge, Mass.

No one doubts its superiority, after reading the directions which enclose the bottle. Many notices are omitted.

Dealers throughout the United States can be supplied at the manufacturer's prices by all the wholesale Grocers and Druggists stores in Boston. Families supplied by all the retail Grocers. Good stores in Boston, Salem, Portsmouth, Newburyport, Worcester, Portland, Springfield—a will keep in all climates, and is well calculated for the Southern market.

For Sale at the Manufacturer's prices by R. J. TAYLOR, Druggist, Thames-street, and Dr. R. R. HAZARD, at the sign of the Golden Mortar, Washington-square.

A NEW BEVERAGE.—Wm. Brown, 43, Washington-street, Druggist and Chemist, has a Syrup, with an effervescent powder, which makes a very agreeable beverage, particularly for warm weather. The principal ingredient in the beverage is good water, a small quantity only of the syrup and powder being necessary to give it sprigliness and an agreeable flavor. It is strongly recommended not only as palatable, but a healthful drink, and its cheapness and convenience give it an additional recommendation.—Boston Daily Advertiser.

SARSAPARILLA.—Wm. Brown has a pure Sarsaparilla syrup of great strength, which used with the powder he sells with it, forms a delightful foaming draught that may be prepared in an instant. He has great skill in getting up such mixtures.—Boston Trans.

A PLEASANT DRINK.—One of the most agreeable summer drinks is Brown's Sarsaparilla Compound. The press at the North are enthusiastic in its praise, as if it was a new and improved Champagne. "If not as refreshing it is certainly more wholesome, and has as much brilliancy, it is less delectable in its sparkling effervescence. Let trial be made of it during the remnant of the warm weather."—Charleston Mercury.

A new article of drink is manufactured by Wm. Brown, 481 Washington street, called "Sarsaparilla Compound," very pleasant and wholesome for warm weather.—Christian Watchman.

A SECOND DRINK.—We have had the pleasure of drawing a cork from the second bottle of Brown's Sarsaparilla Mead, and a greater luxury on a hot day we know not of. It delights the palate, cools the stomach and leaves the head unharmed. Such a drink is economical, pleasant and healthy, worth more than fifteen gallons of the "critter," or a cart load of quack medicines.—Gospel Witness, Hingham.

Brown's Sarsaparilla Compound forms one of the most delicious summer beverages we have ever tasted. A syrup of delightful flavor mixed with water, and a little soda to create an effervescence, form the ingredients of this refreshing drink. The syrup is sold in pint or quart bottles, accompanied by little boxes, containing the suitable proportions of carbonate of soda, and the preparation is perfectly simple and convenient.—New York Times.

BROWN'S SARSAPARILLA COMPOUND.—This new preparation for the alleviation of thirst makes truly a most delicious drink. We speak that we do know, having poured its sweet globules down our throat many a time during the late parching days. It is cheap, too. Moreover it is healthful, containing the virtue of the excellent plant from which the compound takes its name.—Vermont Times.

Brown's Sarsaparilla Compound.—This delightful and pleasant beverage for the summer is fast coming in use, and will soon be an indispensable article in every family. It makes a delightful mead, and is an excellent purifier of the blood. By a very small expenditure of money, the purchaser has a bottle of the Sarsaparilla Compound, and a box containing the Saline powder; the only necessary accompaniment is a pitcher of ice water, and you have a perfect fountain, where, reader, you may refrigerate your heart's content. A little of the saline mixed with the prepared Sarsaparilla will give you as grateful a glass of Sarsaparilla Mead as can be found in the city. We speak from experience; don't take our word, but go and get the article of Wm. Brown, the inventor, 481 Washington street. It may be found at the store where you purchase your groceries, or at any of the druggists. Call for Wm. Brown's No. 1 Silver Top—Boston Herald.

None is genuine except signed by the proprietor, Wm. Brown.

BECK WITH'S ANTI-DYSPEPTIC PILLS

THE Anti-Dyspeptic Pills have been most successfully employed in almost every variety of functional disorder of the Stomach, Bowels, Liver and Spleen, such as heartburn, acid eructations, nausea, headache, pain and distention of the Stomach and Bowels, incipient Diarrhoea, colic, Jaundice, Flatulency, habitual costiveness, loss of appetite, sick headache, sea-sickness, &c. &c. They are a safe and comfortable Aperient for females during pregnancy and subsequent confinement, relieving sickness at the stomach, headache, heartburn, and many of the incidental nervous affections. Literary men, students, and men of sedentary habits, find them very convenient. Those who indulge too freely in the pleasures of the Table, find speedy relief from the sense of oppression and distension which follow, by taking the Pills. *As a Dinner Pill* they are invaluable. Those who are drinking mineral waters, and particularly those from southern climates, and agree and fever districts, will find them a valuable adjunct. Those who are exposed to the vicissitudes of weather on voyages or journeys, can take them at all times with perfect safety. In full doses they are a highly efficacious and safe Anti-bilious medicine. They seldom or never produce sickness at the stomach or griping.

TESTIMONIALS.

From the mass of evidence published in favour of these pills, a few certificates are selected (as many as the limits of an advertisement will conveniently admit of) to show the character of the Pills as well as of the Proprietor, which last is deemed of some importance to establish confidence, at a time when the public are imposed on by so many ignorant and unprincipled empirics.

Dublin County, N. C. March 7, 1834.

To Dr John Beckwith:

Dear Sir—I have with your permission used your Anti-dyspeptic Pills in my Practice ten years, and have thoroughly tested them in my own person; for you know I was much of a Dyspeptic and you will add, something of a rhychochondriac, and have found them an invaluable remedy. My sick-headache is uniformly relieved by them. I feel the public should be made acquainted with their value and receive the benefits of a medicine calculated to do so much good, and to save them from the too common and unadvised use of mercurial preparations. Truly yours,

ELIJAH CROSBY, M. D.

The following Testimonial of the claims of these Pills to public patronage, has been selected from many of similar import, recently furnished.

From the Rt. Rev. Levi S. Lee, D. D., Bishop of North Carolina.

Raleigh, March 2, 1835.

Having for the last three years, been intimately acquainted with Dr. John Beckwith, of this city, and enjoyed his professional services, I take pleasure in stating that his character as a Christian gentleman, and experienced Physician, entitles his testimony, in regard to the use of his Anti-dyspeptic Pills, to the entire confidence of that public. My experience of the good effects of these Pills, for two years past, satisfy me of their eminent value, particularly in aiding impaired digestion, a warding off bilious attacks. Having been for a long time subject to the annual recurrence of such attacks, I was in the habit of resorting for security against them, and with very partial success, to a liberal use of Calomel or Blue Pill. But since my acquaintance with the Anti-dyspeptic Pills of Dr. Beckwith, I have not been under the necessity of using Mercury in any form, besides being wholly exempt from bilious attacks. Several members of my family are experiencing the same beneficial effects.

FRENCH, MUSIC & DRAWING

MRS. BEIMER, (an English Lady) respectfully informs the Ladies of Newport, and the Public in general, that she has opened Classes for **FRENCH, MUSIC, and DRAWING**.—Mrs. B's system of teaching the French Language is now the most approved in Europe; her long residence in France has afforded her the opportunity of acquiring the true pronunciation, and to speak it with its proper accent.

Mrs. BEIMER will also take a select number of Young Ladies, who may be inclined to finish their English Education on the most recent and approved system.—Terms, Letters of reference and respectability, may be seen at Mrs. B's School room, (Mrs. Lyndon's Lodge) opposite Trinity Church, Spring-street.

REYNOLDS & PARNELY'S Celebrated Female Health Restorative.

IS now admitted to be the only remedy upon which implicit confidence can be placed, for the diseases peculiar to the female constitution. It invariably removes obstructions, regulates in most cases of painful, too frequent or profuse menstruation, and has cured the most obstinate cases of fluorals. Dr. J. Morrison, who has practiced medicine some 20 years at Onondaga, N. Y. says, in relation to it,—that "it fits the best medicine now in use. In case of retention, or suppression of the menses I think it will sustain the appellation for specific. I have tried it in the worst cases with admirable success, and I wish for the good of suffering females, that all physicians would introduce it in their practice as I have found the pills to answer fully their recommendation." It is not a cathartic nor recommended to cure all diseases its effects are tonic, and aperient. For particulars, and the opinion of many more eminent Physicians respecting it, you are referred to pamphlets left with the Agents for gratuitous distribution. Price two dollars per box, containing nearly 100 pills. Prepared and sold wholesale and retail by the proprietors Reynolds & Parnely, Pittsford Monroe county N. Y.—Edward Brinley, sole wholesale agent Boston, Mass. For Sale by R. R. HAZARD, in Newport.

MOFFAT'S LIFE PILLS.

And PHOENIX BITTERS.

MOFFAT'S VEGETABLE LIFE MEDICINES.—These Medicines are indebted for their name to their main feat and sensible action in purifying the springs and channels of life, and enduring them with renewed tone and vigor. In many hundred certified cases which have been made public, and in almost every species of disease to which the human frame is liable, the happy effects of MOFFAT'S LIFE PILLS AND PHOENIX BITTERS have been gratefully and publicly acknowledged by the persons benefited, and who were previously unacquainted with the beautiful philosophical principles upon which they are compounded, and upon which they consequently act.

The LIFE MEDICINES recommend themselves in diseases of every form and description. Their first operation is to loosen from the coats of the stomach and bowels, the various impurities and crudities constantly settling around them, and to remove the hardened feces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these and leave such collected masses behind as to produce habitual costiveness, with all its train of evils, or sudden diarrhoea, with its imminent dangers. This fact is well known to all regular anatomists, who examine the human bowels after death; and hence the prejudices of those well informed men against quack medicines, or medicines prepared and heralded to the public by ignorant persons. The second effect of the Life Medicines is to cleanse the kidney and the bladder, and by this means the liver and lungs, the healthful action of which entirely depends upon the regularity of the ordinary organs. The blood which takes its red color from the agency of the liver and the lungs before it passes into the heart, being thus purified by them through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

Moffat's Life Medicines, have been thoroughly tested and pronounced a sovereign remedy for Dyspepsia, Flatulency, Palpitation of the heart, Loss of appetite, Heart burn and Head ache, Restlessness, ill temper, Anxiety, Langour and Melancholy Costiveness, Diarrhoea, Cholera, Fevers, all kinds, Rheumatism, Gout, Dropsies, all kinds, Sores, scorbutic eruptions, and bad Complexions, eruptive Complaints, scum, cloudy and other disagreeable complexion, salt rheum, erysipelas, common colds and influenza, and various other complaints which afflict the human frame.

In FEVER and AGUE, particularly the Life Medicines have been most eminently successful, so much so that in the Fever and Ague districts, Physicians almost universally prescribe them.

All that Mr. Moffat requires of his patients, is to be particular in taking the Life Medicine strictly according to the directions. It is not by a newspaper notice, or by any thing that he himself may say in their favor, that he hopes to gain credit. It is alone by the result of a fair trial.

MOFFAT'S MEDICAL MANUAL.

designed as a domestic guide to health.—This little pamphlet edited by W. B. Moffat, 375, Broadway, New-York, has been published for the purpose of explaining more fully Mr. Moffat's theory of diseases, and will be found highly interesting to persons seeking health. It treats upon prevailing disease, and the causes thereof. Price 25 cents—for sale by Mr. Moffat's agents general.

DR. JAYNE'S EXPECTORANT.

WE consider it a duty to call public attention to this admirable Preparation for Pulmonary Diseases—Especially Coughs, Colds, Consumption, Spitting Blood, Asthma, Bronchial Affections, Hoarse Cough, &c. It is used and very highly approved by persons of the first respectability, but we feel confident in saying that trial of its efficacy will be its best recommendation.

DR. JONATHAN GOING, President of

the Granville College, Ohio, (late of New York,) in a letter to Dr. Jayne, dated New York, December, 1836, says "He was laboring under a severe cold, cough and hoarseness, and that his difficulty of breathing was so great that he felt himself in imminent danger of immediate suffocation. It was perfectly cured by using this Expectorant."—Mrs. Deiks, Salem N. J. was cured of Asthma of twenty years standing, by using two bottles of this medicine.—Mrs. Ward, also of Salem, was cured the same complaint by one bottle.—A young lady, also of Salem, who was believed by her friends to be far gone with Consumption was perfectly restored to her usual health.—Dr. Hamilton, of St. James, South Carolina, was greatly affected by cough, hoarseness and soreness of the lungs, and on using a bottle of this medicine for permanent relief.

Mr. Nicholas, Sen one of the Deacons of the First Baptist Church in this city, been perfectly cured by it—after having suffered for sixty years with Cough, Asthma and Spitting of Blood, which no remedy could relieve.

The Rev. C. C. P. Crosby, late Editor of the American Baptist, writes as follows.

New-York, June 15, 1838.

The Rev. JOSEPH RUSLING, well known in this City as a pious and popular Clegman of the Methodist Episcopal Church, in letters to the proprietor says that he has had repeated spells of spitting blood, and violent hemorrhage from the chest for sixteen years,—and had suffered dreadfully Asthma, pain in his breast, difficulty breathing, Dyspepsia—night sweats, and or hard dry Cough, by which his constitution was completely undermined and broken down. For five years he was unable to attend to his ministerial duties and for the last five months immediately previous to his using Jayne's Expectorant; he had been entirely confined to his room, without the most distant prospect of ever leaving it, but for the grave. His friends had long been looking for the termination of his severe and protracted sufferings in death.—He was not able to get any sleep after one or two o'clock in the morning, on account of his cough which harassed him incessantly until near ten o'clock, when he usually became more easy but still suffered by more or less cough throughout the day. The best medical advice this city could offer had at all times been at his command, and every expedient his numerous friends could devise for the mitigation of his sufferings had been tried in vain. The best medical prescriptions failed of even giving him temporary relief. A friend now urged him to try Jayne's Expectorant, and presented him with a bottle, from which he found so much benefit, that, on continuing its use, he was soon enabled to resume his ministerial duties, and in a late communication to the proprietor he says:—Dr. D. Jayne: In communication with you in relation to effects produced on my system by your Expectorant last summer, the following are the results of my observation viz.—1st. A easy expectoration—2d. An alleviation of asthmatic oppression—3d. Comfortable repose at night by a reduction—of cough. If the above observations will be useful to any of your patients, you are well come to them.

Respectfully yours, &c
J. RUSLING
